

# Anjel OBryant

**Anjel OBryant M.D.I.A.**  
**Interior Designer**  
**Commercial and Residential**  
**Colour Response Analyst**  
**Accredited Trainer**  
**Writer/Author**  
**Keynote Speaker in Colour**  
**Communication**

**The Queen of Colour, Anjel is Australia's leading Colour-response Analyst with more than 35 years experience.**

**Using a scientifically based colour-response technology, Anjel has found it to be a vital component in corporate and private areas of our society, empowering personal energies, increasing business profits and lifting property values.**

A student of the science of colour, Anjel has been involved in a vast range of colour applications including training in London with Elizabeth Arden as a beauty consultant and later as a fashion and image manager. Anjel is an adviser to corporations, architects and homeowners, her technical advice and practical know-how has

been used in the development of buildings as varied as prisons, hospitals, childcare centres, aged care facilities and schools. She is constantly researching the latest products on the market for men and women for her latest book "Colour My Home" assisting homeowners to choose colours to enhance their family energy levels. Anjel is working on two new books about using colour for people with Alzheimer's and how colours can be used to support the needs of our children today.

*My passion is to **humanise environments and empower people's lives** by using and sharing the latest on the **science of Colour Response Technology***

Her enthusiastic and entertaining presentations have trained individuals and corporations such as Boral Bricks, Luxaflex and Dulux showing them how the empowering use of colour will improve their personal lives and corporate image. She has been known to arrive with layers of clothing in various colours, which she unexpectedly gradually removes to demonstrate the effects of colour on people.

On other occasions, she has asked her audience to select and colour blank squares to demonstrate their subconscious colour needs.

To achieve the maximum impact she analyses and recommends the most appropriate colour choices for the office and home environment, for vehicles, signage, letterheads and website to help achieve significant results in productivity and profitability.

She incorporates the work of Dr Max Luscher, Johannes Itten, Sir Isaac Newton and many other scientific researchers in this field.

Working in Fleet Street for an advertising agency and London Vogue including sales promotion, advertising and marketing is another area of expertise, a frequent guest on radio, television and press Australia wide. Anjel has been a feature writer for Better Homes and Gardens, Vogue, Queensland Homes Magazine, Home Show Magazine, Interior Design and Decoration, and Australian House and Garden.
